945B 8 Digit DigiBus Desktop Switchboard Station

The Elvox® 945B switchboard is a master for the 8 Digit DigiBus System. The 945B provides conversation with apartment stations as well as a door entry panel(s). LCD readout annunciates both incoming and outgoing calls, F1 and F2 emergency/alarm signals by apartment code. Call memory stores unanswered call for future reference. Call signalling is by pleasant electronic tone. Simple call and answering procedures provide a quick and error free communication system. The 945B also has provisions for Day/Night operation with part time doorman by switching conversation to entry panel(s). Remote lock control pushbutton allows the concierge station to control a remote door lock(s) at the entry panels.
