945F/T

2Wire Desktop Switchboard Station

The Elvox® 945F/T switchboard is the master for the 2Wire System. The 945F/T provides conversation with apartment stations and door entry panel(s). LCD readout annunciates incoming and outgoing calls by resident name and apartment code. Call memory stores unanswered call for future reference. Call signaling is pleasant electronic tone. The 945F/T also provides Day/Night operation for part time doorman by switching conversation to entry panel(s). A camera input allows residents to view visitors at the concierge desk. Remote lock control allows the concierge station to control door at the entry panels.
